how **Stella

makes it work

"I like mixing masculine pieces with very feminine ones, and I don't like to have the same clothes as everyone else, so I always try to find something slightly different or vintage. I love the ease of dresses; I've been working really hard these past two years and haven't had much time to think about clothes, so being able to get dressed in one second has been essential. Layering a summer dress gives it so much more life, meaning you can wear it most of the year."

SHIRTDRESS + JEANS

"Everyone is loving this Zara dress at the moment, but I like to wear it on top of jeans, closed or open, or throw a hoodie over it. It's super-versatile. A great pair of jeans is essential for every wardrobe – for me, the more comfortable and boyish, the better."

JUMPER + DRESS

"This is a look I would wear on holiday by the sea, when it gets a bit cooler in the evening. Layering a great jumper over a pretty summer dress looks really chic. It's something I also do at weddings, where I get lots of compliments – it's a good twist on simply adding a jacket. I love the colour combination of red and pink, so the hot-pink mules look fab."

SLIP DRESS + T-SHIRT

"I'd wear this outfit any time – to work, or on the weekend. It has a grungy, 1990s feel that goes very well with my jewellery; I have a lot of chokers and necklaces that I love to layer. I tend to wear closed-toe shoes in light colours in the summer, and here the white Dr Martens really highlight the neon dress and white tee."
